(P.T.O.)

IV. Read the following passage and answer the questions set on it :

There are about fifty different species of sparrows living throughout the world. They are only about four to six inches in length.

Sparrows prefer to build their nests in low places like ground clumps of grass, low trees and low bushes. They rarely build their nests in high places. The nests are built with twigs, grasses and plant fibres, usually small and well built.

Female sparrows lay four to six eggs at a time. The eggs are white with reddish spots. The egg hatch in eleven to fourteen days. Both parents feed them with insects. Adult sparrows mainly eat seeds. The large feet of sparrows are used for scratching seeds. Sparrows can be found in almost all places where there are humans.
